

THIS IS MY FAMILY. WE WENT TO A McDONALD'S FARM TO LOOK AROUND

For 3/4 of the year from March - November the animals roam freely over 3 fields. they have 1 1/2 acres per mother + calf. That is a lot of space! They have access to lots of fresh grass, running water and can shelter under trees.

- Calf mix. All natural, mostly grown on the farm

I've seen the adverts. I know McDonald's burgers are 100% beef.

BUT

What exactly goes into the beef?

CHRIS (THE FARMER) STARTED REARING CATTLE AS A HOBBY

Where else are the farmers so passionate and respectful to the animals health + happiness?

These are the cuts of beef used to make the burgers. No offal, no brains, no entrails. Pure beef only.
